What does your current tech stack for learning look like?

cluttered & complex

a bit of this, a bit of that

no idea what this is, not sure

lots of fun

decent, fine

nonexistent

a mess

?

fragmented!

coincidental

Good tools, but operating in silos and not integrated
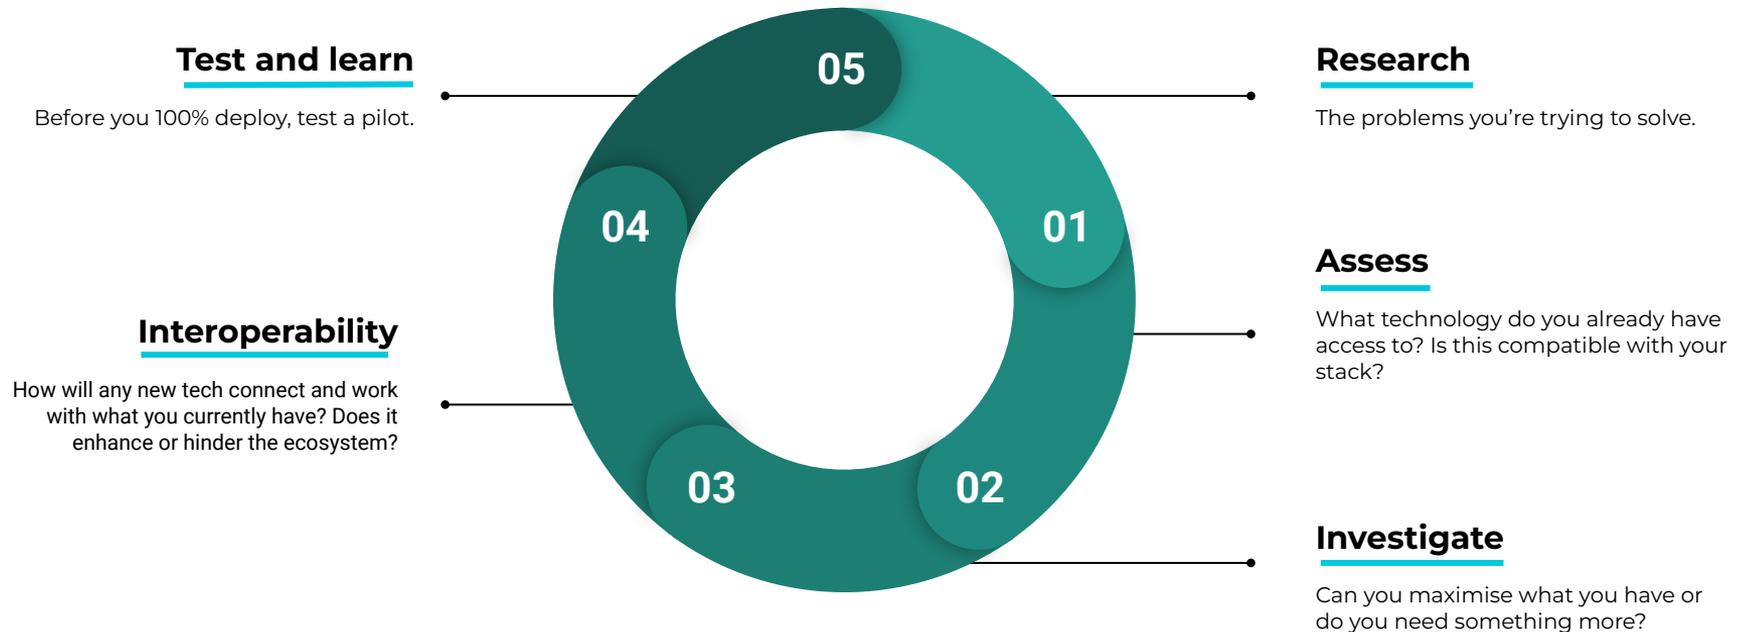

What is a learning tech stack?

3 questions to design your perfect stack

1. What's in your `current stack`?

2. What `problems` do you need to solve?

3. What are your `non-negotiable` features?
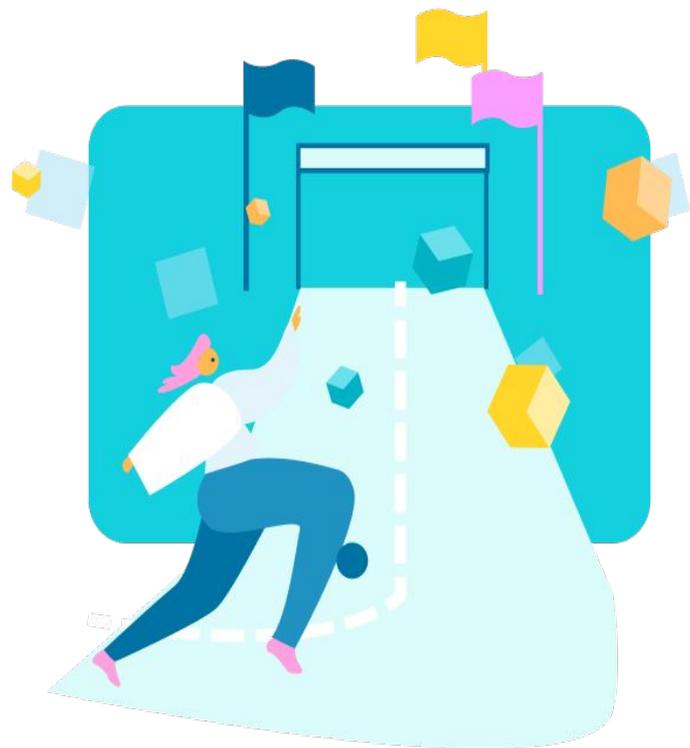

Best-of-breed vs all-in-one solution & alignment to strategy

The 5-step framework to build your tech stack today

Test and learn

Before you 100% deploy, test a pilot.

Interoperability

How will any new tech connect and work with what you currently have? Does it enhance or hinder the ecosystem?

05

02

Research

The problems you're trying to solve.

Assess

What technology do you already have access to? Is this compatible with your stack?

Investigate

Can you maximise what you have or do you need something more?

How to get buy-in
from your C-suite

Build Skills

Live classes · Videos · Online courses · Podcasts · Coaching + mentoring · Articles + books

Understand Skills

Performance reviews · Skills + competency frameworks · Ratings + feedback · Development plans · Assessments + certifications · Labor market intelligence

Activate Skills

Job shadowing · Projects · Gigs · Stretch Assignments · Tasks · Jobs
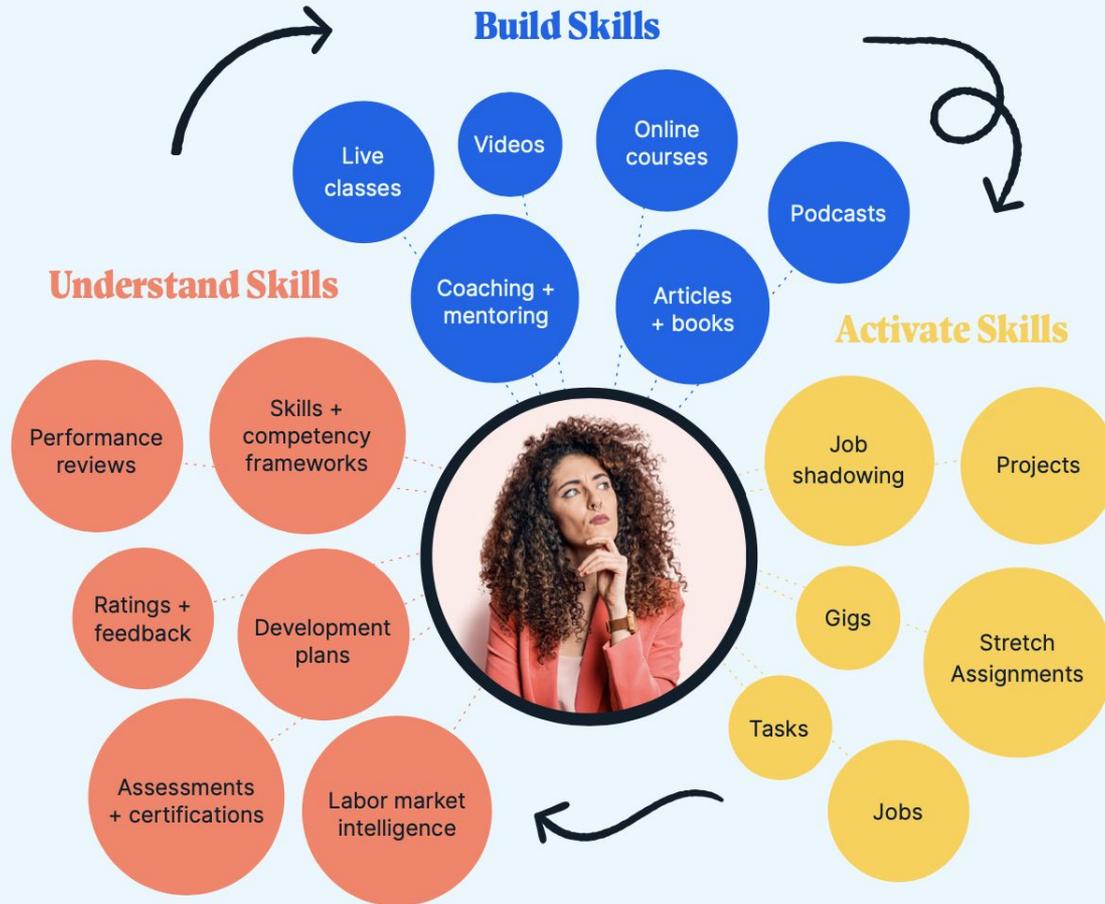

Does your workforce have the skills to take on tomorrow?
